

COOKIES POLICY

What is a Cookie?

Cookies are small text strings used to perform computer authentication, session monitoring and storage of specific information about users accessing the server and are usually present in each user's browser. Some operations would not be possible without the use of cookies, which in some cases are technically necessary.

The law states that "technical" cookies can be used even in absence of consent; these include:

- Cookies implanted in the user/contractor terminal directly by the owner of the single website, if they are not used for other purposes: this is the case of session cookies, authentication cookies, customization cookies (for example, for the choice of the navigation language), etc.
- Cookies used to statistically analyse accesses/visits to the site (so-called "analytics" cookies) which pursue exclusively statistical purposes and collect information in aggregate form.

Differently "profiling cookies", aimed to create user profiles, are used to send advertising messages in line with the preferences expressed by the user during the web navigation. Due to the particular invasiveness that such cookies may have in the private sphere of users, the European and Italian legislation require that the user must be adequately informed to express a valid consent about their use.

A further element to consider concerns third parties' cookies. This type of cookies integrates features developed by third parties within the pages of the site such as icons and preferences expressed in social networks in order to share site content or to use third parties' software services (such as software to generate maps and additional software that offer additional services). These cookies are sent from third parties' domains and from partner sites that offer their functionality between the pages of the site.

Cookies on this Web Site

Azimut Investments Limited (hereinafter, also, "Data Controller") does not use any cookies.

How to disable cookies

The use of "technical" cookies by Azimut Investments Limited can be avoided through the settings of them browser. Although the "Help" function of most browsers indicates how to configure it so that it signals when a new cookie is received on the device, refuse new cookies, or disables them altogether, to facilitate users, the links to the instructions on how to disable cookies through the configuration of different browsers are shown below.
